

With the construction of light rail on Cedar, the city will effectively be split into two major areas: **east of Cedar, the Lower Town Area**, and **west of Cedar, the Rice Park Area**, as many east/west travel routes will be affected by construction. See map for the light rail construction route in Black. So having a strategy for getting into and out of downtown will be important depending on destination.

Here are some tips that may help with your travel:

From the South to the Rice Park Area

Option A: Take 494 Exit Robert Street left. Continue on Robert North to Cesar Chavez/Wabasha left. Continue on Wabasha to parking facilities located in downtown

From the South to the Lower Town Area

Option A: Take 494 Exit Robert Street left. Continue on Robert North to parking facilities located in downtown
